

Company Profile

Welcome to Blue Desert Interiors...

Blue Desert Interiors has earned an impressive reputation for balancing traditional architecture with modern living since 1990. A passion for the clean, uncluttered look of a contemporary style influences many of the designs the firm produces and materials are often used in unexpected ways to create a unique interior by thinking outside the box. Acknowledging that client tastes always take precedence, however, Blue Desert Interiors' designs are often a masterful blend of contemporary with more traditional touches.

Clients quickly learn that Blue Desert Interiors is one of those exceptional interior design firms that really *listens and responds* to them. President and principal designer, Mark LaPalm, IFDA, lives by the belief that at every step of the process, client needs and ideas are treated with the respect they so richly deserve. Dedicated to creating the best quality of life for his clients at home or at the office, Mark challenges their design sense by guiding them to explore beyond the traditional boundaries of design to discover the ideal styles that best match their wants and needs. Whether the project is simple or complex, the client is considered an integral part of the design experience. In creating a true collaboration that is fun, educational and fulfilling, a truly individual vision is born. The result is intensely personal interiors that immediately feel like home.

The firm, which specializes in construction detailing for everything from new builds to renovations and tenant improvements, is highly experienced in designing residential and commercial as well as healthcare interiors. Dedicated to quickly bringing visions to life, the firm brings a considerable range of design talents to every project. Extensive product knowledge of both construction components and furnishings coupled with skills such as design concept development, plan review, architectural detailing, space planning, kitchen & bath design, and tile design allow the firm to unite form with function to bring out the true potential in a project.

-more-

Many projects reflect a skillful, almost seamless, integration of the latest technology into the overall design. One of Mark LaPalm's greatest skills lies in the area of color selection. Thanks to his ability to predict color trends as much as a year before other color specialists, Blue Desert Interiors' projects transcend the ordinary to become timeless interiors.

Over the years, Blue Desert Interiors has earned an excellent reputation for its ability to effectively address client design and function needs. Challenging projects such as designing offices in multiple states for the Lipson Neilson , Cole, Seltzer, Garin, P.C. law firm and rebranding Care Meridian, a company that cares for brain injured patients in a skilled nursing facility, have proven the firm's skills. Accepting and successfully completing Care Meridian's challenge, Blue Desert gave the facility a completely new, updated image while creating a functional space that enhanced caregiver efficiency as well as patient comfort and healing.

Blue Desert Interiors specializes in creating finely detailed interiors that reflect a masterful blend of modern with classic styles that incorporate innovative lighting, exquisite window treatments and exceptional fine art selection. A nationally renowned design firm serving clients in Arizona, Michigan, California and Nevada from their studio in the Scottsdale, Arizona, Blue Desert Interiors provides unique interior design solutions for residential, commercial and small- as well as large-scale healthcare environments.
